EBA CLEARING is the leading private provider of pan-European payment infrastructure services. Close to 200 banks are direct users of the single payment services EURO1 and STEP1, which handle transactions for a total value of almost EUR 200 billion each day. The SEPA Credit Transfer (SCT) and SEPA Direct Debit Services (SDD Core and B2B) of the Pan-European Automated Clearing House STEP2 extend full reach to banks in SEPA adhering to the EPC Schemes. On peak days, STEP2 clears more than 115 million SEPA payments, which makes the platform a major building block of SEPA.
